

MINING PRODUCTS CATALOGUE

IMS International Mining Services is a market leading drill consumable company, providing products and technical support to the mining and exploration drilling industries.

With operations in Mauritius, Africa, Australia and Canada, IMS is dedicated to serving drilling companies by providing proven, market leading products to increase production and lower overall costs and downtime.

ROTARY BITS

ROTARY BITS

IADC	WEIGHT ON BIT PER INCH OF BIT DIAMETER (LB/IN)	ROTARY SPEED (R/MIN)	CUTTING STRUCTURE	APPLICATIONS
412 415	1000 — 2000	90 — 120	Conical on gage and inner rows	Designed for very soft formations with low compressive strength and high friability such as shale, soft limestone, sandstone, gravel clay, soft dolomite, coal
432 435	1000 — 4000	90 — 120	Conical/Chisel	Designed for very soft formations with low compressive strength and high friability such as shale, soft limestone, sandstone, gravel clay, soft dolomite, coal
532 535	2000 — 5000	80 — 110	Conical/Chisel on gage, Conical inner rows	Designed for soft formations with low compressive strength, such as shale, soft limestone, interbedded dolomite, coal.
612 615	3000 — 5000	60 — 100	Conical/Spherical on gage Conical inner rows	Designed for high compressive strength, medium hard and abrasive formations, such as limestone, sandstone, interbedded dolomite.
632 635	3000 — 6000	60 — 100	Conical/Spherical on gage Conical inner rows	Designed for high compressive strength, medium hard and abrasive formations, such as limestone, sandstone, interbedded dolomite.
732 735	4000 — 7000	60 — 90	Spherical on gage, Conical/Double spherical on inner rows	Designed for high compressive strength, hard and abrasive formations, such as granite, limestone, sandstone, dolomite.
832 835	5000 — 8000	50 — 80	Spherical on gage, Double spherical on inner rows	Designed for high compressive strength, hard and abrasive formations, such as magnetite quartzite, quartzite, granite.
